

## University Bulletin Boards

---

The University provides bulletin boards throughout the campus for the purpose of disseminating information important to members of the University community. Each of the colleges has an official bulletin board which is reserved exclusively for the use of the Dean in posting official announcements and other information specifically related to the college. In addition, other official bulletin boards are located in proximity to various offices and are reserved for official information related to the respective offices. No materials should be posted on these official bulletin boards without the approval of the person in charge.

Materials for bulletin boards within the residence halls must be turned in at the Housing Office, Brock Hall 121, for approval and posting. Once approved, materials will be distributed to the residence halls and posted by members of the Housing staff. Any materials posted on bulletin boards within residence hall areas without prior approval from the Housing Office will be removed and thrown away.

General bulletin boards-those not assigned to specific offices-are available for posting of important information by faculty, staff, and students, including notices from student organizations and other groups directly related to the University. Since bulletin boards are provided for meaningful communication within the University community, all notices should be relevant to faculty, staff, and/or students and should comply with accepted standards of good taste. All flyers and posters posted on bulletin boards must conform to the "poster regulations" listed in the next section.
