Hello Ms. Conza,

OU's diversity, equity, and inclusion training does not impose specific ways of thinking, but instead, presents situational examples of how to engage with the broader world in a way that is understanding of all people and perspectives. EverFi training modules are based on best practices and data gathered by EverFi researchers and developers. OU officials have consulted with EverFi regarding all training concerns brought forward to the university. OU will continue to monitor its training efforts while continuing to advance the university's work of engaging community members in a meaningful learning experience with the goal of fostering a more inclusive campus community.

Thanks,  
Kesha Keith  
OU Director of Media Relations
