Subject: Email Threat

Alex,

The email Liz Arcos forwarded states the we should review the IP address. I don't see an IP address on here. Did she mean the email address ? Do you have the IP address ?

Otherwise this email looks like it was written by an adolescent, in my opinion. There are a lot of triggering "buzz" words, along with grammar usage and syntax that are very telling. I am not concerned about an actual threat, but I get why we shut down. Better safe than sorry.

The term "New Klan" is an old term, 1920s and mostly used in the south, more of an east coast thing. The email may be in refence to a Lincoln Rocker, a type of rocking chair found on the east coast, and the numbers 8812 come back to an IRS form...

I ll keep poking around to see if anything else comes up.

Not sure if you were told, but I was told that channel 11 called asking about the campus shut down. They were referred to Marc.

P.S.

I don't see a DR on this. Who is taking the paper ?
